

Software Requirements Specification (SRS)

1. Introduction

1.1 Purpose

This document defines the requirements for the Web Up platform, a SaaS application enabling agencies, businesses, and individuals to create and manage websites, sales funnels, and project workflows. The specification aligns with the ISO/IEC/IEEE 29148:2011 standard.

1.2 Document Conventions

High Priority: Indicated with (High). Medium Priority: Indicated with (Medium). Functional Requirements: Numbered as REQ-1, REQ-2, etc.

1.3 Intended Audience and Reading Suggestions

Developers: Focus on Section 3 for technical requirements. Project Managers: Review Sections 1 and 2 for scope and dependencies.

1.4 Product Scope

Web Up provides scalable solutions for creating websites and sales funnels with integrated tools for project management.

1.5 References

Stripe API Documentation, PCI DSS Compliance Standards, GDPR Guidelines, Next.js Documentation, Prisma Documentation.

2. Overall Description

2.1 Product Perspective

Web Up expands traditional website builders by incorporating multivendor capabilities, advanced analytics, and project management tools.

2.2 Product Functions

Multivendor SaaS, Role-based Access Control, Website & Funnel Builder, Stripe Integration, Media Storage, Project Management.

2.3 User Classes and Characteristics

Agencies: Manage client projects and oversee billing. Sub-account Users: Access restricted features

based on roles.

2.4 Operating Environment

Frontend: Built with Next.js 14, Backend: Prisma for database operations, Hosting: AWS or Azure.

2.5 Design and Implementation Constraints

Technology Stack: Must use Next.js 14, Prisma, and Stripe.

2.6 User Documentation

Comprehensive manuals, FAQs, video tutorials, and help guides.

2.7 Assumptions and Dependencies

Stable internet access for all users. Stripe and third-party APIs must remain operational.

3. Requirements

3.1 Functional Requirements

REQ-1: Users can create and manage sales funnels and websites. REQ-2: Agencies can manage sub-accounts with role-based access. REQ-3: Vendors can register and sell products/services. REQ-4: Secure payment processing via Stripe. REQ-5: Task tracking with Kanban boards. REQ-6: Users can upload and manage media files. REQ-7: System provides funnel performance metrics. REQ-8: Users can customize dashboards with analytics widgets. REQ-9: Support for light and dark mode.

3.2 Nonfunctional Requirements

Performance: Must support 50,000 concurrent users. Reliability: System uptime of 99.9% or higher.

Security: Compliance with GDPR and PCI DSS standards.

4. External Interface Requirements

4.1 User Interfaces

Dashboard: Configurable widgets for analytics. Website & Funnel Builder: Interactive drag-and-drop interface.

4.2 Hardware Interfaces

Standard input devices: Keyboard, mouse, touchscreen.

4.3 Software Interfaces

Prisma: Database management. Stripe: Secure payment gateway. Next.js: Frontend and backend logic.

4.4 Communication Interfaces

HTTP/HTTPS: Secure client-server communication. WebSockets: Real-time notifications.

5. Appendices

Glossary

B2B2B: Business-to-Business-to-Business. SaaS: Software as a Service.

Analysis Models

Use case diagrams, activity diagrams, ER diagrams.

TBD List

Finalize cloud provider selection. Define supported languages for internationalization.
